The ideal candidate thrives on challenges, keen coach and learner, stays up-to-date with the latest trends and technologies and is pro-active problem solver that communicates well in a collaborative environment.

## **Mobile App developer:**

As a Mobile Developer, you will be responsible for developing customer-facing mobile applications for Android, iOS AND/OR Native APP. You will work closely with our skilled development team and cloud engineers to deliver an integrated experience that will delight our customers. The responsibilities for this position will stretch over the full app development cycle from design and development to testing, debugging and documentation. This position requires great organizational skills, attention to detail, and innovative thinking.

## **Responsibilities**

- Work with Graphics director, development and data teams to create beautiful, responsive applications for Android and/or iOS Devices AND/OR Native APP
- Maintain and develop existing mobile applications to ensure that they stay current with operating system updates and high quality standards
- Connect to RESTful endpoints to consume and display data
- Ensure that UI/UX designs conform to Human Interface Guidelines for their respective devices
- Utilize application metrics and custom reports to measure engagement and performance make improvements
- Attend and contribute to Agile ceremonies including daily standup, sprint review, sprint planning, technical grooming, and retrospective
- Stay current with advancements in mobile technology, new concepts and best practices
- Adhere to our company values and promote creativity, collaboration, and growth in the team
- Collaborate with colleagues to constantly innovate and improve app functionality and design
- Participate in weekly backlog grooming, bi-weekly planning, and other meetings remotely.
- Perform code reviews regularly for your peers

- Utilize application performance monitoring tools to ensure performance targets are met
- Assist the development team by performing 3rd level support duties on a voluntary and/or rotational basis
- Liaise with Product development team to plan new features

#### **Role Competencies**

- Object-oriented design, coding and debugging skills in native iOS and/or Android languages (Swift, Objective-C, Java, Kotlin) AND/OR ReactNative
- Understanding of web services technologies such HTTP and REST
- Understanding of mobile UI/UX best practices and platform-specific interface guidelines
- Experience with third-party libraries and APIs
- Familiarity with Test Driven Development (TDD) and relevant frameworks
- Familiarity with Linux/Unix along with some command line skills
- Excellent communication skills, both written and verbal
- Excellent analytical and problem-solving skills
