Job Description
Position: Frontend Developer**.**
Location: Xiamen, Fujian / Remote.
Working with: UI/UX developer.

About Us for recruitment:
At Investmate, we're building the first most friendly social invest company. Investigate is on a mission to help our people succeed by bringing innovation, simplicity, and humanity to investment. We measure our efforts by the success our users enjoy and the advocacy they exhibit. We are succeeding because they are happy.

Guided by our shared values, we thrive in an environment where collaboration and openness are valued. We believe that innovation is powered by perspective and that teamwork and respect for each other lead to superior results. We elevate each other and obsess about doing the right thing. Our associates serve with humility and a deep respect for their responsibility in helping our customers achieve their goals and realize their dreams. Together, we are on a quest to change the world.

Investmate is the destination of choice for an outstanding, seasoned and full-of-possibilities careers with a knack for strategic thinking with well-honed impactful and dynamic team. The ideal candidate thrives on challenges, keen coach and learner, stays up-to-date with the latest trends and technologies and is pro-active problem solver that communicates well in a collaborative environment.

Frontend Developer:

The position requires both technical skills and creative insight, and the smarts to shift between those two disciplines. The incumbent will be responsible for designing, coding and modifying websites to match with the Mobile App, from layout to function respecting client's specifications.

RESPONSIBILITIES:

- Understanding, absorb and implement project objectives with visual requirements within the brand parameters.
- Must be competent enough to address constraints encountered within the media for which a particular project is assigned to the team.
- Develop stunning, robust and user-friendly websites using frontend technologies
- Collaborate with colleagues to constantly innovate and improve website functionality and design
- Take full responsibility of communicating project status and deliverables with managers and team members in clear, concise terms.
- Participate in daily weekly backlog grooming, bi-weekly planning, and other meetings remotely.
- Test and troubleshoot across multiple browsers, platforms and devices.
- Consider project objectives, challenges and parameters before offering practical solutions.
- Design and develop responsive email templates with a variety of email platforms such as Marketo, MailChimp, CampaignMonitor and others.

Requirement:

1. Proficient understanding of web markup, including HTML5, CSS3

2. Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
3. Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery
4. Good understanding of **{{Depending on the specific case, a developer should have the knowledge of advanced JavaScript libraries and frameworks, such as AngularJS, KnockoutJS, BackboneJS, ReactJS, DurandalJS etc.}}**
5. Good understanding of asynchronous request handling, partial page updates, and AJAX
6. Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as as Gimp or Photoshop is a plus.
7. Proficient understanding of cross-browser compatibility issues and ways to work around them.
8. Proficient understanding of code versioning tools, such as **{{Git / Mercurial / SVN}}**
9. Good understanding of SEO principles and ensuring that application will adhere to them.
